Technical Data Sheet
StoFlexyl

Organic filler for sealing in the plinth area or in the soil

Characteristics

Application
• exterior
• as a primer, bonding mortar, filler, reinforcement, priming coat and sealing compound
• as an adhesive compound for bonding Sto-Plinth Insulation Boards in the plinth area and in the soil
• as a reinforcing compound for reinforcement in the splash zone and in the soil
• as a moisture protection coat for coating over the finishing render in the splash zone and in the soil

Properties
• moisture protection in the soil and plinth area
• good adhesion to bitumen substrate
• highly versatile in use
• no masonry sealing effect

The characteristic values stated are average values or approx. values. We use natural raw materials in our products, which means that the stated values can vary slightly in the same delivery batch; this does not affect the suitability of the product for its intended purpose.

Substrate

Requirements
The substrate must be firm, level, dry, load-bearing and free from grease and dust. Damp or not fully cured substrates can lead to defects in subsequent coats, such as blistering or cracks.

Preparations
Check existing coatings for their suitability and load-bearing capacity. Remove any non load-bearing or structurally weak coatings. The substrate must be cleaned where necessary.

Application

Application temperature
Lowest temperature of substrate/air: +5°C
Highest temperature of substrate/air: +30°C
Technical Data Sheet
StoFlexyl

Mixing ratio
StoFlexyl / Cement CEM I 32.5 = 1.0 : 1.0 parts by weight

Material preparation
Add cement CEM I 32.5 according to the above-mentioned mixing ratio. Stir homogeneously with a mixer. Use water to achieve application consistency.

Consumption
<table>
<thead>
<tr>
<th>Type of application</th>
<th>Approx. consumption</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sealing</td>
<td>3.90 kg/m²</td>
</tr>
<tr>
<td>Bonding</td>
<td>2.00 kg/m²</td>
</tr>
<tr>
<td>Primer and moisture protection coat</td>
<td>0.50 kg/m²</td>
</tr>
<tr>
<td>Reinforcement</td>
<td>1.30 kg/m²</td>
</tr>
</tbody>
</table>

The consumption of the material depends on the application method, substrate and consistency, amongst other factors. The specified consumption values are only to be used as a guide. Where required, exact consumption should be established on the respective project.

All specifications without cement, when adding cement double the value.

Application
Manually

As sealing compound:
Fill on primer (adhesion primer). Do not go below the minimum consumption/layer thickness (3 mm).

As bonding mortar:
Apply onto insulation boards with a 15 x 15 mm toothed trowel (in case of substrate unevenness of up to max. 1 cm/m).

As primer or moisture protection coat:
Dilute with approx. 10% water, apply with a brush.

As reinforcing compound:
Apply onto the insulation boards with a rust-free steel trowel. Embed Sto-Glass Fibre Mesh and smooth the surface.

Drying, curing, reworking time
The drying time depends on the temperature, wind and relative humidity. During unfavourable weather conditions it is imperative that suitable protective measures (e.g. protection against rain) be applied to the work in progress and freshly completed facades.

Successive coats may be applied after 24 hours when the air and foundation/base temperature is of about +20°C and the relative humidity is of 65%.

Cleaning the tools
Clean tools with water immediately after use.

Indications, recommendations, special information, miscellaneous
Further details for application can be found in the system-related application guidelines.

**Special information**

The information or data serves to ensure the product's intended purpose or its suitability for use and is based on our findings and experience. Nevertheless, users are responsible for establishing the suitability of the product for its intended use. Applications other than those explicitly mentioned in this technical data sheet are only permissible after prior consultation with Sto AG. Where no approval is given, such applications are at the risk of the user. This applies in particular when the product is used in combination with other products. When a new technical data sheet is published, all previous technical data sheets are no longer valid. The latest version is available on the Internet at www.sto.com.
