Plasters, paints and special  
coatings for  
interior applications

# Sto Interior Systems

More room for quality of life.

The designing of interior space requires the interaction of the building elements, colour and light to create an atmosphere and define the functionality of the room.

Sto with a range of plasters, paints and special coatings can provide aesthetically unique textures and finishes that remain functional and durable.

## **Stolit: Coloured organic finishing render**

Stolit organic finishing renders are manufactured in Europe and certified around the world.

They have been in successful use for over 50 years on a variety of different substrates. During this time they have undergone a continual process of optimisation.

The perfect combination of properties:

Durable, strong, hardwearing, impact resistant, malleable, weather resistant, colour stable and highly resistant to micro-organism. They are designed with good vapour permeability to allow the building to breathe while still repelling liquid water. All renders are easy to apply and can be tinted from the StoColor System or matched to the colour of your choice, using the Sto spectrometer.

**Stolit K 1.0 mm**

**Stolit K 1.5 mm**

Coloured self gauging float finishing renders.

**Stolit K 2.0 mm**

**Stolit K 3.0 mm**

Coloured self gauging float finishing renders.

**Stolit MP**

Coloured fine float, sponge or light adobe finishing render.

**Stolit MP Natural**

Coloured fine finish float, sponge or light adobe sand speckled finishing render.

## A systematic approach to colour design.

### A structured system offering enormous variety

The StoColor System is a unique planning instrument for the use of colour. A total of 800 different colours establish a sound foundation for creative and pioneering colour concepts.

The StoColor System eschews colorimetric logic in favour of the human perception of colour. It is based primarily on the colours yellow, orange, red, violet, blue and green. These six sections are then mixed to form the 24 basic tones which correspond to the 24-part colour wheel.

Each basic tone is assigned five colour rows which embody the principle of the same-colour triangle. This guarantees the StoColor System's high degree of functionality – designed in line with the aesthetic colour requirements in construction.

### Active Interior Paint

StoClimasan Color incorporates a special photocatalyst which is able to continuously degrade organic compounds, including carbon monoxide and water, under the influence of light. Organic compounds are highly prevalent in indoor areas. They originate from building materials, furniture, items of daily use and a host of other sources. StoClimasan Color is able to degrade these substances on a continuous basis:

### Sto Special Coatings

#### StoLook Marmorino

Mineral decorative intermediate plaster on lime base, for special effects in marble look on even substrates, in various colours.

#### StoLook Veneziano

Mineral decorative intermediate plaster on lime base, for surfaces in classico, liscio, travertino and rustico style, tintable with StoLook Punto F marble powder
