

## **Technical Data Sheet**

## StoSilent Coll MW

Mineral system ahesive for StoSilent acoustic systems

### Characteristics

#### Area of application

- interior
- as bonding mortar for StoSilent direct acoustic systems
- on mineral substrates
- on organic substrates with an intermediate coat of StoSilent Prep Quartz
- onto organic substrates with an intermediate coat of StoPrep Contact

#### **Properties**

- good wet adhesive strength
- optimum resistance to flow
- ideally matched with StoSilent direct acoustic systems

### Technical data

Criterion	Standard / test specification	Value/ Unit	Notes
Bulk density of hardened mortar	EN 1015-10	1.4 g/cm <sup>3</sup>	
Flexural strength (28 days)	EN 1015-11	6.0 N/mm <sup>2</sup>	
Compressive strength (28 days)	EN 1015-11	20.0 N/mm <sup>2</sup>	
Dynamic modulus of elasticity (28 days)	TP BE-PCC	10,000 N/mm²	
Thermal conductivity	EN 1745	≤ 0.82 W/(m*K) for P=50 %	Table value
Thermal conductivity	EN 1745	≤ 0.89 W/(m*K) for P=90 %	Table value
Spreading rate	_	740 L/t	_

The characteristic values stated are average values or approximate values. Due to the natural raw materials in our products, the stated values can vary slightly in the same delivery batch; this does not affect the suitability of the product for its intended use.

Substrate	
Requirements	The substrate must be flow-proof, smooth, load-bearing, clean, dry, and free from sinter layers, efflorescence and release agents.
Preparations	Check existing coatings for their suitability and load-bearing capacity. Gypsum and pre-mixed plasters of mortar groups P IV and P V:

# **Technical Data Sheet**

# StoSilent Coll MW

Remove any sinter skin and dust off the surface. Prime with StoPrim Plex and apply an intermediate coat of StoSilent Prep Quarz.

Application			
Application temperature	Lowest temperature of substrate/air: +5 °C Highest temperature of substrate/air: +30 °C		
Time for application	At +20 °C: approx. 60 - 90 minutes		
Mixing ratio	8.5 l of water per 25 kg		
Material preparation	Mix for approx. 2 minutes. Allow to mature for approx. 3 minutes. Remix for approx. 30 seconds.		
Consumption	Type of application	Type of application Approx. consum	
	adhesive	3.5 - 4.0	kg/m²
	per mm layer thickness	1.2	kg/m²
	among other factors. The stated consumptic guide. If required, determine precise consun specific project.		
Application			
Application	manually

## **Technical Data Sheet**

## StoSilent Coll MW

Packaging	sack
Storage	
Storage conditions	Store in dry and frost-free conditions.
Storage life	The quality of the product in its original container is guaranteed until the maximum storage life has expired. The storage life date can be deduced from the batch number of the container.  Batch number explanation:  Number 1 = the last number of year, numbers 2 + 3 = a calendar week i.e.: 8450013223 – storage life until week 45 of the year 2018

Identification	
Product group	Bonding mortar

### Special notes

The information in this Technical Data Sheet serves to ensure the product's intended use, or its suitability for use, and is based on our findings and experience. Users are nevertheless responsible for establishing the product's suitability and

Applications not specifically mentioned in this Technical Data Sheet are permissible only after prior consultation. Where no approval is given, such applications are at the user's own risk. This applies in particular when the product is used in combination with other products.

When a new Technical Data Sheet is published, all previous Technical Data Sheets are no longer valid. The latest version is available on the Internet.
